

# Change Log - Asset Package Version 3.0

## Utility Network Properties

- Add Subnetwork Controller Category to Asset Group Medium Voltage Service, Asset Type Primary Meter Circuit Source MV

## Class

- Electric Assembly
  - Corrected misspelling of High Voltage Controller Asset Group
- Electric Device
  - All subtype 0 names were changed back to Unknown
  - Added Asset Group High Voltage Arrester with Asset Types of
    - Unknown
    - Indoor Arrester HV
    - Station Arrester HV
  - Added Asset Group Medium Voltage Arrester with Asset Types of
    - Unknown
    - Elbow Arrester
    - Station Arrester
  - Added Asset Group High Voltage Tap Changer with Asset Types of
    - Unknown
    - Tap Changer Controller HV
    - Regulator Tap Changer HV
    - Transformer Tap Changer HV
  - Added Asset Group Medium Voltage Tap Changer with Asset Types of
    - Unknown
    - Tap Changer Controller MV
    - Regulator Tap Changer MV
    - Transformer Tap Changer MV
  - Changed field name from nominalvoltage to nominalvoltageineline
  - Changed field name from nominalvoltageg to nominalvoltageinelineground
- Electric Junction Object
  - All subtype 0 names were changed back to Unknown
  - Added Asset Type Static Wire to Asset Group Aerial Bare
  - Changed field name from nominalvoltage to nominalvoltageineline
  - Changed field name from nominalvoltageg to nominalvoltageinelineground
- Electric Line
  - Added Asset Type Overhead Neutral to Asset Group Medium Voltage Overhead Conductor
  - Changed field name from nominalvoltage to nominalvoltageineline

- Changed field name from nominalvoltageg to nominalvoltageglinetoground
- Electric Edge Object
  - Added Asset Type Static Wire to Asset Group Aerial Bare
  - Changed field name from nominalvoltage to nominalvoltageglinetoline
  - Changed field name from nominalvoltageg to nominalvoltageglinetoground
- Structure Edge Object
  - Added Asset Type Static Wire to Asset Group Wire Aerial Support
